PROFESSIONAL SUMMARY

A passionate aspiring Data Engineer and Analytics professional with hands-on experience in Databricks and Power BI, focused on building data-driven solutions and deriving insights. Proficient in Java and SQL with a strong foundation in data processing. Familiar with Machine Learning, Cloud fundamentals, and emerging AI concepts such as AI agents and agent-based frameworks, along with DevOps tools including Docker and Git.

EDUCATION

Sathyabama Institute Of Science and Technology <i>BE Computer Science and Engineering</i>	8.44 CGPA 2022 – 2026
Amaravati College <i>Class XII</i>	78.2% 2020 – 2022
Sri Chaitanya Techno School <i>Class X</i>	97.5% 2019 – 2020

EXPERIENCE

Data Engineering Intern <i>Mphasis Ltd.</i>	Jan 2026 – Apr 2026 Bangalore, India
- Worked on the Annaly Capital Management project as part of the data engineering team, utilizing Databricks to build and optimize data pipelines in a cloud-based environment. - Developed and executed data transformation workflows using PySpark and SQL in Databricks, enabling efficient data processing and supporting analytics use cases. - Gained hands-on experience with Databricks, Power BI, Linux, and MongoDB, applying these tools for data ingestion, visualization, and data management tasks.	

PROJECTS

Annaly Capital Management <i>Databricks, PySpark, SQL</i>	Jan 2026 – Apr 2026
Designed and built ETL pipelines using Databricks (PySpark, SQL) and developed interactive dashboards in Databricks to support data processing, analytics, and reporting.	
WebPilot AI <i>Browser-Use, Playwright, API, Langchain, Docker</i>	Sep 2025 — Oct 2025
Built an AI-driven web agent using Browser-Use and Playwright to automate browser tasks through natural language prompts. Integrated the Gemini API for intelligent instruction processing and used Docker for containerization, ensuring consistent performance and easy deployment across systems.	
Diabetes Risk Prediction Model <i>Pandas, scikit-learn, Gradio</i>	Nov 2024 – Jan 2025
Built a machine learning model to predict diabetes likelihood based on patient data. Integrated the model with a user-friendly web interface using Gradio for real-time interaction.	

TECHNICAL SKILLS

Languages: Java, Python, SQL
Data Engineering And Analytics: Databricks, PySpark, Power BI
AI: AI Agents (Familiar), Agent Frameworks (LangChain, LangGraph), Observability Tools (Langfuse)
DevOps And Tools: Docker, Git

CERTIFICATES

Databricks Certified Data Engineer Associate	MPHASIS, 2026
Oracle Cloud Infrastructure Certified Foundations Associate	ORACLE, 2023
Machine Learning	COGNIBOT, 2025
